CATTLE CONTENTION

With our PREMIUM contention range, restraint pens, races, Corral handling can be created.

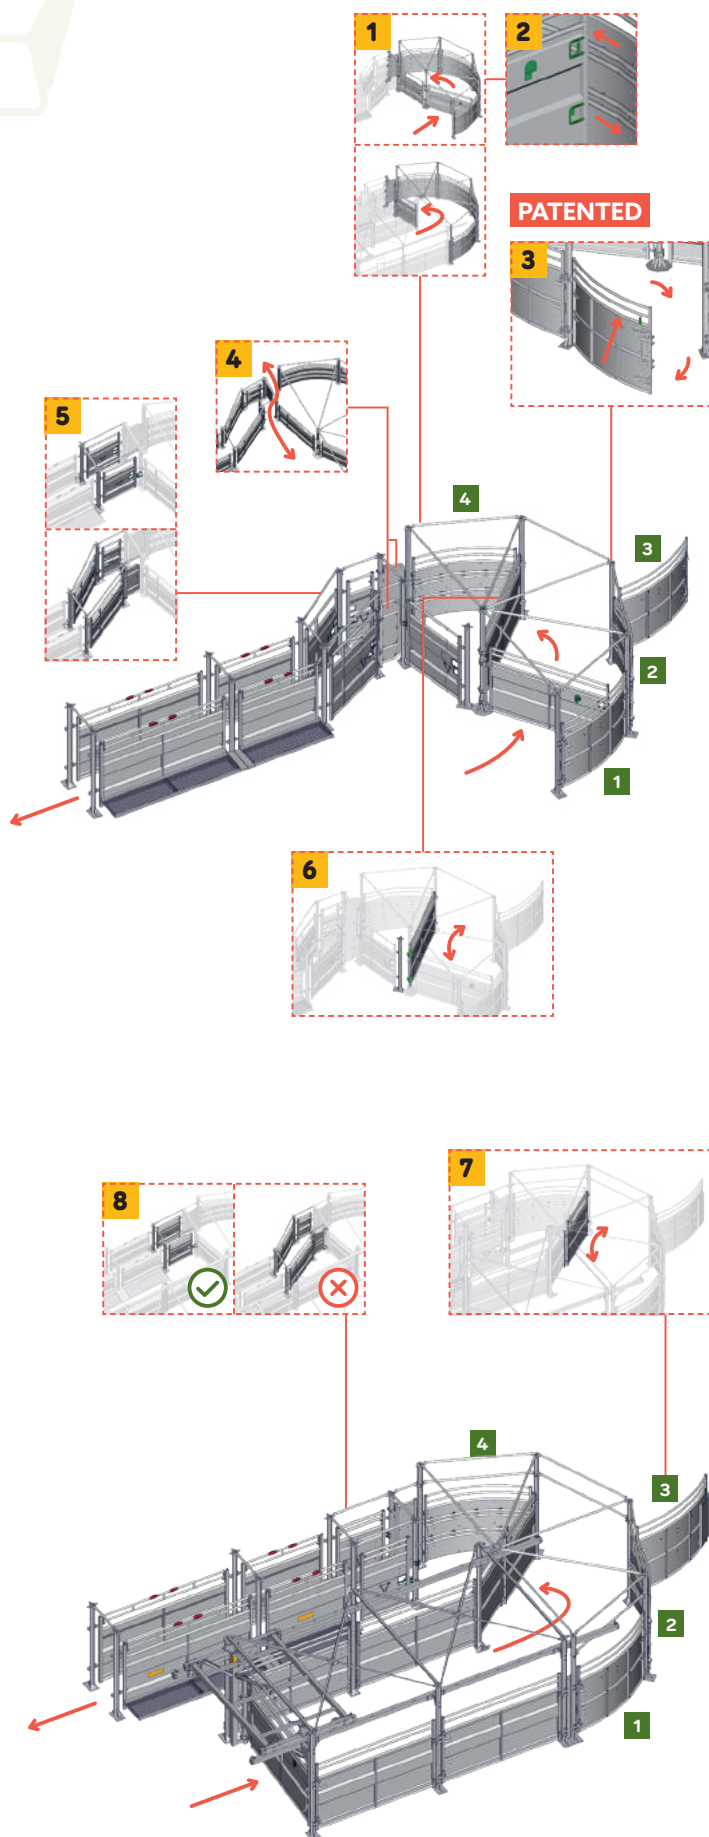

Animals can be handled smoothly in maximum safety; access to working areas can be provided with gates to simplify man passages.

With this range we wanted to respond as well as possible to our farmers' needs.

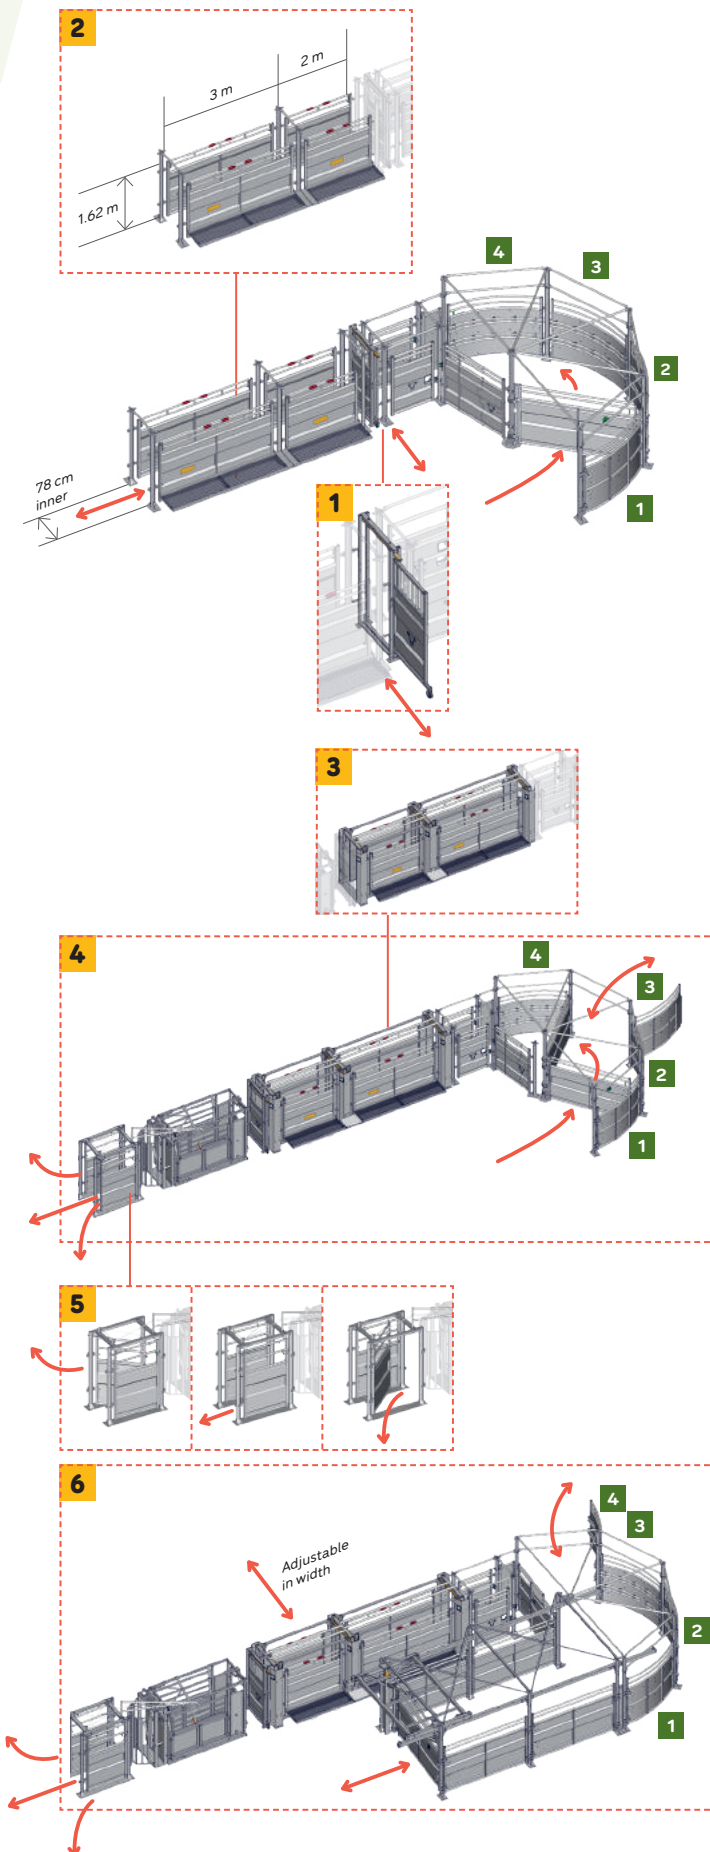

IN GENERAL, CATTLE ARRIVE FROM THEIR HOLDING AREAS OR FROM EXTERNAL UNLOADING AND ARE THEN LED SAFELY ALONG A CATTLE CROWD GATE FOLLOWED BY A HALF-CORRAL. THEY ARE THEN LED EITHER TOWARDS A LOADING DOCK OR TO A CONTENTION HANDLING RACE WHICH WILL BE EQUIPPED WITH A CATTLE CRUSH FOR HEALTH CARE AND WEIGHING WITH THE POSSIBILITY OF ADDING A SORTING GATE AT THE EXIT.

CONTENTION 1/2 CORRAL PANEL

- 1 THE PREMIUM HANDLING 1/2 CORRAL** can be installed alone or with a push lane.
- 2 1/2 CORRAL** with safety lock of the rotation barrier in clockwise or anti-clockwise operation.
- 3 1/2 CORRAL** with an opening portion by patented double autolock handle. **PATENTED**
- 4 OPENING METAL GATE** for safe farmer passage.
- 5 1/2 CORRAL EXIT,** allows selecting a Corral exit which is straight or curved.
- 6 DOUBLE LOOP OPTION FOR 1/2 CORRAL,** for a stop and allowing entry or exit by any portion of the 1/2 Corral.
- 7 DOUBLE LOOP OPTION FOR PUSH LANE,** for a stop and allowing entry or exit by portion No.3 or No.4 of the 1/2 Corral.
- 8 FOR A PUSH LANE,** to choose only a straight Corral exit.

CONTENTION EXIT, CORRIDOR AND 3-WAY DOOR

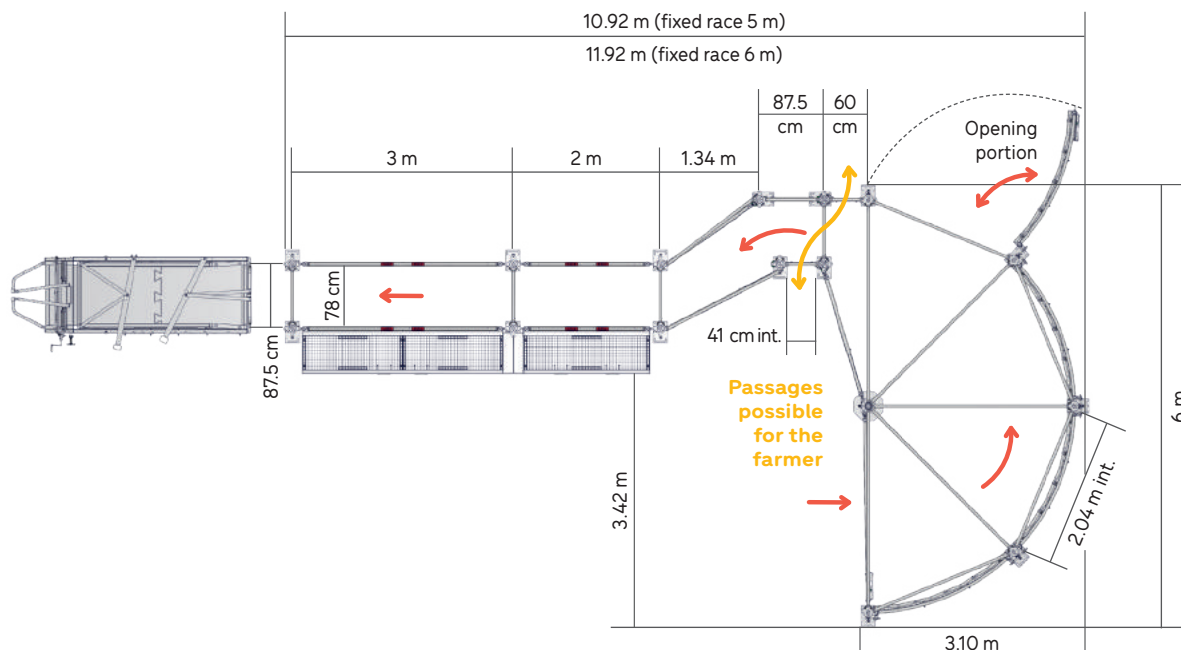

- 1 SECTIONAL DOOR**
allowing walkways to be closed safely.
- 2 FIXED HANDLING CORRIDOR**
with fixed sheeted barriers (2 or 3 m) and folding rail. Optional footplate for access in height.
- 3 HANDLING ADJUSTABLE CORRIDOR IN WIDTH**
made of fixed sheeted barriers (2 or 3 m) with folding rails. Adjustable in width from 46 to 80 cm. Footplate on the work zone.
- 4 COMPLETE PREMIUM CONTENTION** with double loop and straight exit 1/2 Corral, adjustable corridor with cage and 3-way door.
- 5 3-WAY SORTING DOOR**
with rope operated barriers to sort and direct the animals (left, right or forward). Barriers with springs to return to initial position.
- 6 COMPLETE PREMIUM CONTENTION** with push lane, loop and straight exit 1/2 Corral, adjustable corridor with cage and 3-way door.

CONTENTION TYPE C1

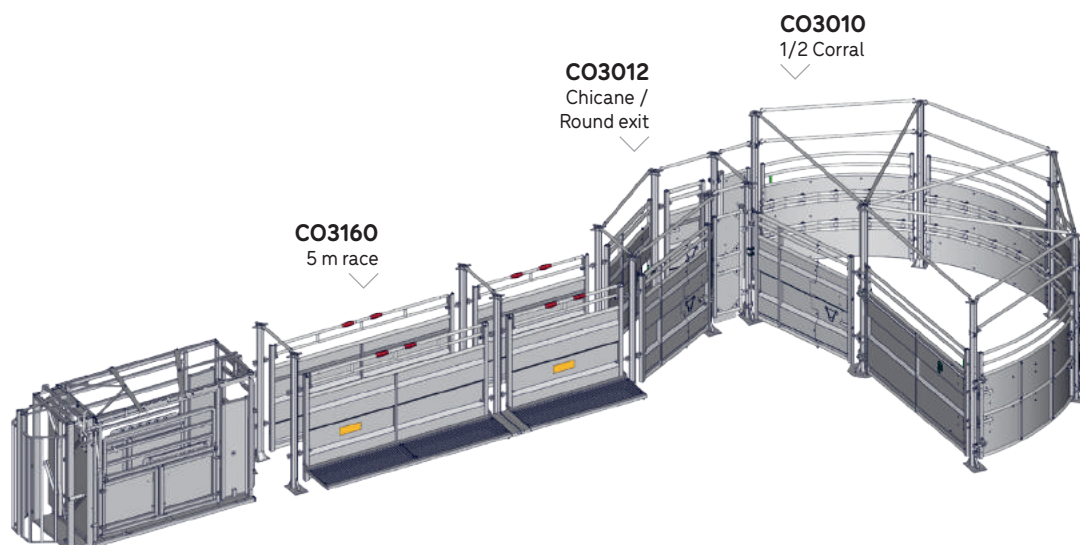

PREMIUM 1/2 anticlockwise Corral with round exit and fixed 5 m race.

A portion of the 1/2 Corral opens with a **double AUTOLOCK handle. PATENTED**

2 man passage sheeted gates enable the farmer to pass quickly through the restraint handling race.

■ 1/2 PREMIUM HANDLING CORRAL ON PLATFORM

The 1/2 Corral handling on platform allows the animals to advance.

It is composed of a pivoting central post held at the top by 5 spacer bars.

A fixed sheeted contention barrier is mounted on a sleeve enabling clockwise and anticlockwise pivoting and locking by catches on the round barrier.

The 1/2 Corral PREMIUM is delivered with a **double AUTOLOCK lever** **PATENTED** for opening a portion of the 1/2 Corral for access to a loading dock with provision of the "double loop" option.

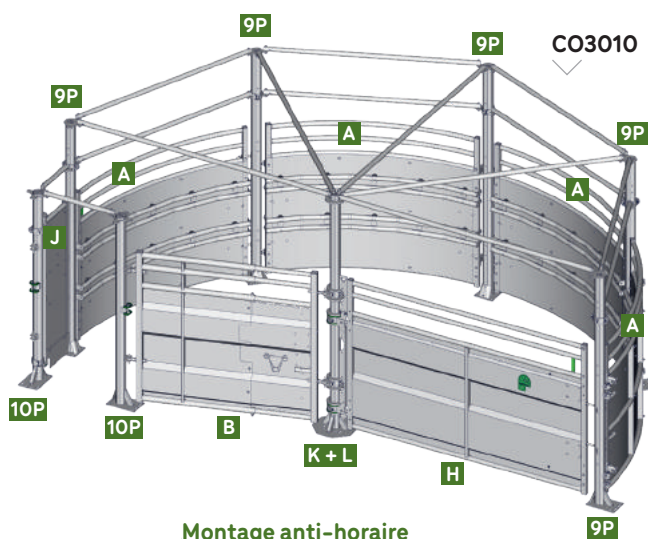

It is installed on a 20 cm thick concrete slab, quality concrete of strength C25/30 MPa, post fixed with 4 dowels M12 L. 160 mm.

CAUTION!

CORROSION

Various solutions are on option to limit zinc loss and corrosion of steel due to prolonged contact with silage, bedding and manure, and we recommend regular maintenance.

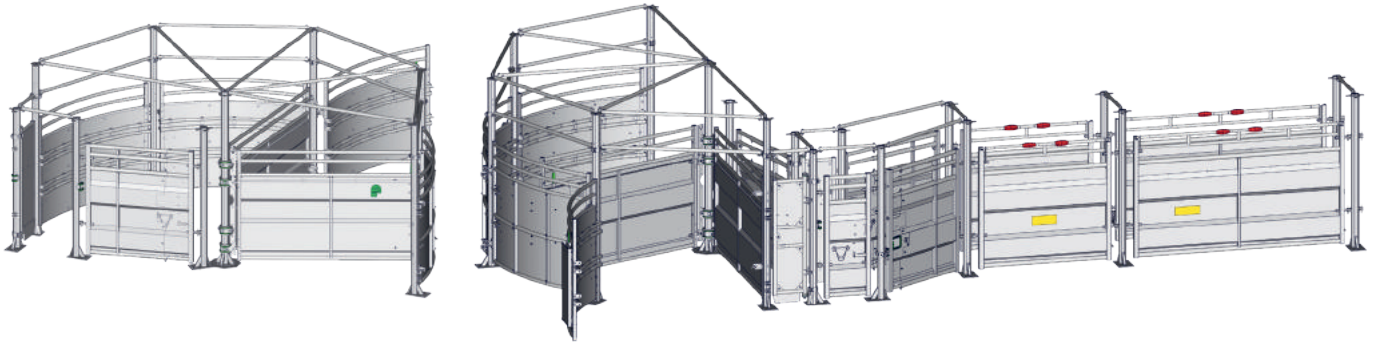

Please see our general conditions of use on the Internet site.

Follow the Corral assembly plan.

REMEMBER

The posts for the 1/2 Corral on platform are 2.42 m long with a welded collar to receive the spacer bars.

DOUBLE LOOP FOR 1/2 CORRAL HANDLING

With a PREMIUM Corral handling installed without cattle crowd gate, a second crush barrier can be added on the pivoting post of the 1/2 Corral.

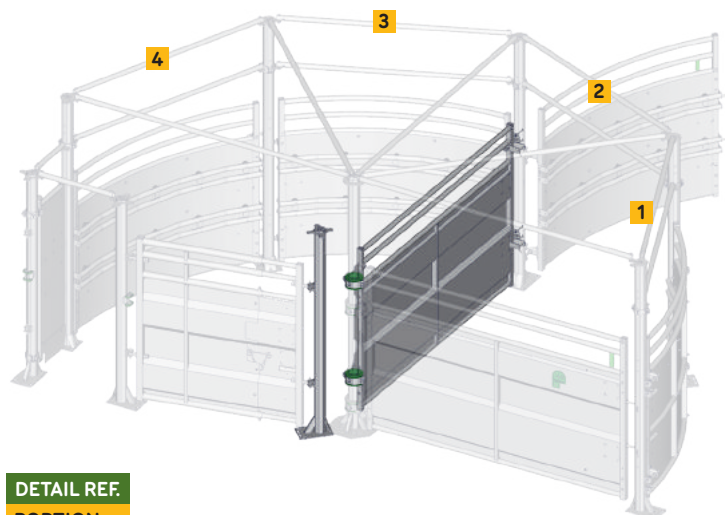

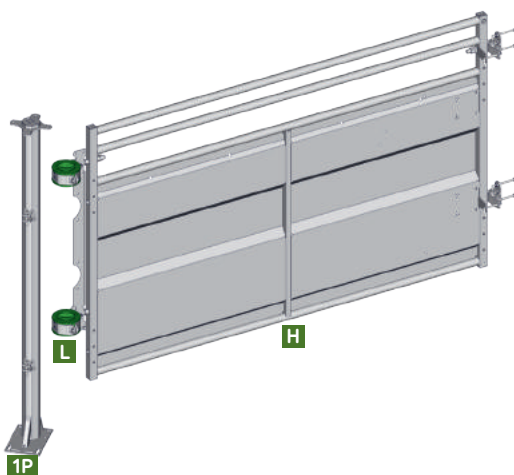

This barrier is blocked at the post to form a stop, often at portion 3 or 4 of the 1/2 Corral, allowing animals to be brought in or out without passing through the restraint handling race.

The two pivoting barriers of the 1/2 Corral must be rotated together if a restraint handling race is used. In general, the portion of the 1/2 Corral open on to a loading dock.

■ ROUND EXIT CONTENTION CHICANE

The round exit chicane is installed after the 1/2 Corral handling without cattle crowd gate.

It allows a curve to be introduced before the restraint handling race. It has a 60 cm sheeted gate man passage and an 88 cm fixed gate for passing quickly and safely from the working area to outside the contention system. The sheeted barrier 1/2 m can close the access to the restraint handling race to bring the animals out on the side.

Clockwise mounting

■ STRAIGHT EXIT

The straight exit is installed after the 1/2 Corral handling.

It allows a 1.30 m long exit to be introduced before the restraint handling race. It has a sheeted gate L. 1.30 m and a 60 cm man passage for the 1/2 Corral for passing quickly and safely from the working area to outside the contention system.

A sectional gate is often added at the straight exit before the restraint handling race.

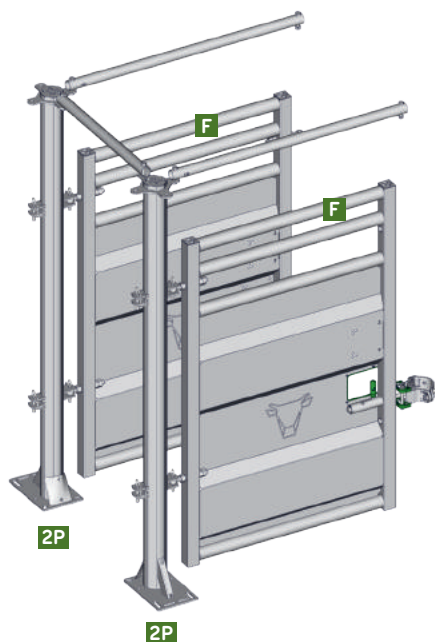

The straight exit can be installed with a 1/2 Corral alone as with a 1/2 Corral for cattle crowd gate.

Anticlockwise mounting

■ FIXED 5 M RACE ON PLATFORM

The sheeted race enables animals to be moved safely.

It is to be installed to the desired width. The fixed race is delivered with **one side equipped with a walkway**.

With the walkway and a folding rail, the farmer has **free access above the animals and in safety**.

The folding rail is unlocked with a quick movement of two handles towards the interior.

The rail is locked quickly by the **two AUTOLOCK bolts**. **PATENTED**

The fixed race on platform **is easily installed on a perfectly flat concrete slab**.

A quality concrete will withstand the trampling of animals on the platforms. In the area where animals pass, provide a swept finishing concrete to prevent falls. Ground fixing dowels not supplied.

We recommend at least a 20 cm thick slab with strength of C25/30 MPa. Use at least 4 dowels M12 L. 160 mm per post.

**USE CONTENTION POSTS. BARE POSTS ON FOOT PLATE WITH BRACKETS ARE UNSUITABLE.
IF INSTALLING A RACE WITHOUT A DOUBLE BEND, ORDER 2 EXTRA POSTS.**

■ RACE ADJUSTABLE ON PLATFORM

The adjustable sheeted race enables animals to be moved safely.

It is composed of **2 single gates** and **a double gate**. The gates are made with OCTAGONAL tubes Ø 102 mm welded on a wide flat foot plate with 2 non-slip studs. The gates have a rail with castors supporting a frame which itself supports a sheeted barrier with folding rail. **The rails enable quick and simple adjustment** with double locking by pin. If an animal refuses to advance, the sheeted barrier of the race can open for it to come out by the side. The gates are spaced from each other. **The width can be adjusted from 46 to 80 cm**, the space at the posts is filled by a mobile sheeted casing which adapts automatically to adjustments.

For a longer race, simply order a race extension composed of a double post and two sheeted barriers with frames.

The adjustable race is **delivered with one side equipped with walkways**. With the folding rail, the farmer can have **clear and safe access above the animals**.

The **folding rail** is unlocked with a quick movement of two handles towards the interior. It is locked just as quickly with **two AUTOLOCK bolts**. The adjustable race is available only on platform and **is installed on a perfectly flat concrete slab**.

A quality concrete will withstand the trampling of animals on the platforms. In the area where animals pass, provide a swept finishing concrete to prevent falls. Ground fixing dowels not supplied. We recommend at least a 20 cm thick slab with strength of C25/30 MPa. Use at least 4 dowels M12 L. 160 mm per post.

THE DIMANSIONS ARE GIVEN FOR INFORMATION PURPOSES, SEE THE LAYOUT DRAWING. NB TAKE INTO ACCOUNT THE HEIGHT AND WIDTH OF THE RACE TO ALLOW FOR THE POSSIBILITY OF OPEN ING THE SHEETED BARRIER SIDEWAYS. THE RACE IS DESIGNED ONLY FOR FIXED SHEETED BARRIERS WITH FOLDING RAIL.

ADJUSTMENT IN STEPS OF 5.5 CM.

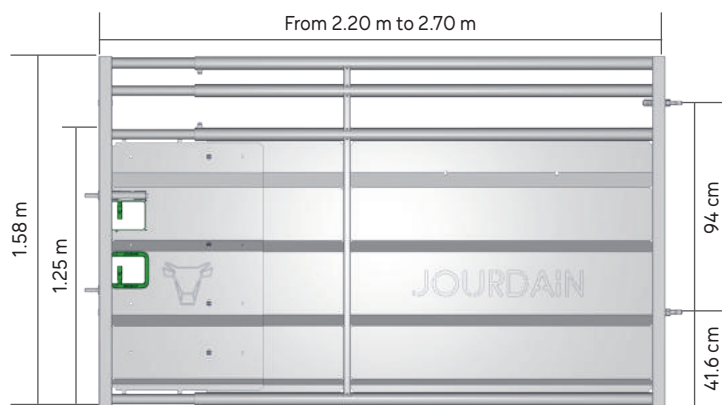

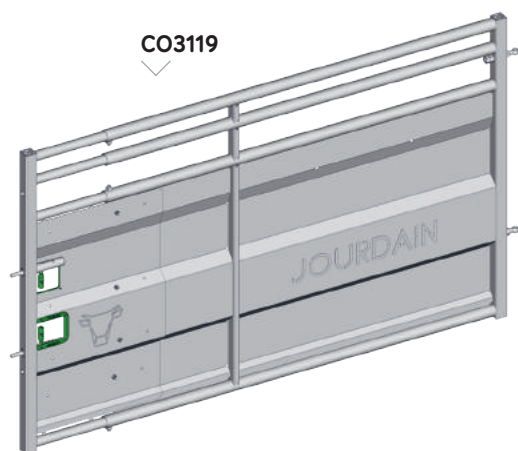

■ ADJUSTABLE SHEETED CONTENTION BARRIER

The contention barrier is adjustable by 50 cm.

It is composed of a 1 m, 1.50 m or 2 m rear sheet, combined with a front sheet allowing a choice of panel or AUTOLOCK door. The front part has two cut-outs in the panel to fit a door, if necessary cut out the hand passage and fit the plastic protection.

When mounting, according to the length when mounted, the sheet must be drilled from the front to fit the screws holding the sheets between the front and the rear. The 1.58 m high sheeted barrier has a sheeted part 1.25 m high. Barrier lengths are the OCTAGONAL contention post axis/axis dimensions Ø 102 mm.

C	CO3118	Adjustable sheeted contention barrier 2 m/2.50 m V2	100 kg
D	CO3119	Adjustable sheeted contention barrier 2.50 m/3 m V2	117 kg

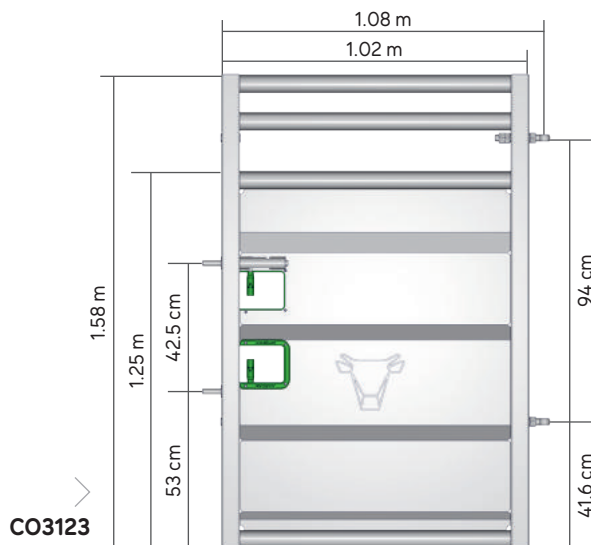

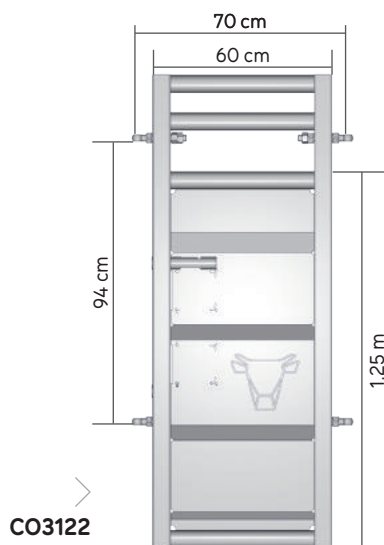

■ SHEETED FIXED CONTENTION GATE

Enables a choice of panel or fixed AUTOLOCK gate.

The 1.58 m high metal barrier has a sheeted part 1.25 m high. It has two cut-outs in the panel to fit a door, if necessary cut out the hand passage and fit the plastic protection.

Sheeted gate lengths are the fixed OCTAGONAL contention post axis/axis dimensions Ø 102 mm.

E	CO3122	Fixed sheeted gate L. 0.88 m V2	35.4 kg
F	CO3123	Fixed sheeted gate L. 1.30 m V2	50 kg

■ SHEETED BARRIER WITH FOLDING RAIL

Fixed sheeted barriers with folding rail are not adjustable.

They are used for restraint handling races with a folding rail on the top part.

They give the farmer **clear and safe access above the animals**.

The folding rail is unlocked with a quick movement of two handles towards the interior.

It is locked just as quickly with **two AUTOLOCK bolts**. Fixed sheeted barriers with folding

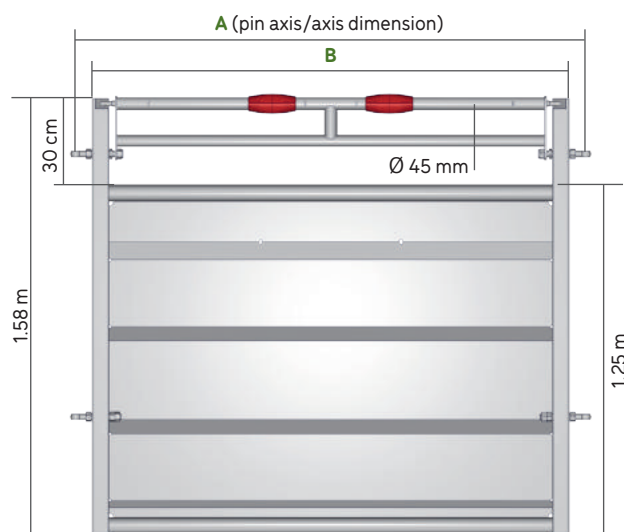

rail are provided to be equipped with a folding walkway **on option**. The 1.58 m high sheeted barrier has a sheeted part 1.25 m high. The lengths are the fixed OCTAGONAL contention post dimensions Ø 102 mm.

■ WALKWAY

Walkways are retractable and robust.

They **are mounted only on fixed sheeted barriers with folding rail**. The walkway is composed of a robust metal frame with galvanized metal slats allowing soil to pass through.

The walkway **gives safe access above the animals**. It is supported by the barrier.

A fixed or adjustable walkway extension must be provided between two walkways to avoid gaps between the two walkways.

■ FIXED SHEETED CONTENTION BARRIER

The fixed sheeted contention barrier is constructed with 50 mm square section and is sheeted to a height of 1.25 m.

It can be mounted between posts Ø 102 mm with 4 eyebolts or opening with 2 AUTOLOCK bolts.

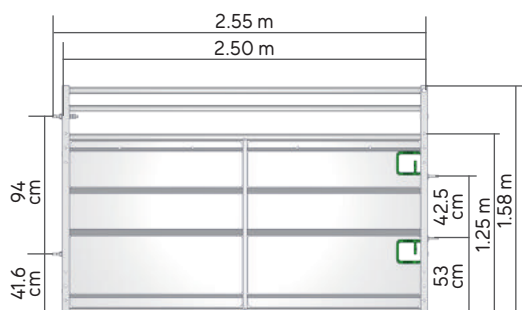

The 1.70 m and 2.78 m versions are delivered with 4 eyebolts and 2 AUTOLOCK bolts.

The 2.78 m integrated man passage version is only mounted non-opening between 2 posts of Ø 102 mm.

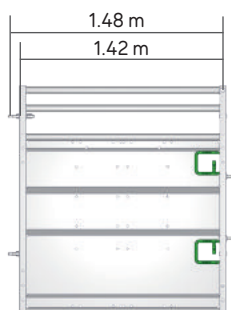

This barrier is used only to make restraint races.

G CO3045	Fixed sheeted contention barrier L. 1.70 m	62 kg

■ CURVED CONTENTION BARRIER

The sheeted 1/2 Corral curved barrier is delivered with 4 offset hinges reducing the play between the square section and the OCTAGONAL post. It can only be opened outwards from the 1/2 Corral.

It has 2 safety latch systems (invertable according to mounting) enabling the 1/2 Corral pivoting barrier to be locked.

A CO3020	PREMIUM curved Corral barrier	116.5 kg
-----------------	-------------------------------	----------

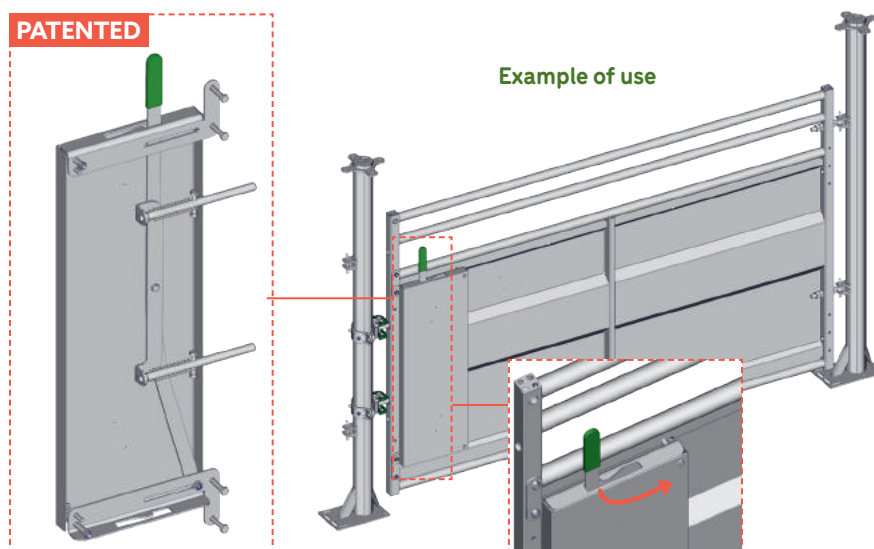

■ DOUBLE AUTOLOCK CONTENTION LEVER OPTION

The double AUTOLOCK lever opens the AUTOLOCK bolts in a single movement while maintaining the use of the slam latch with the SURLOCK® bracket.

The 1/2 Corral PREMIUM is delivered as standard with a curved opening portion equipped with a double AUTOLOCK lever. The double AUTOLOCK lever for PREMIUM contention with barriers L.1.70m **CO3045**, L.2.78m **CO3025** and curved **CO3020**. It can be purchased retail and is delivered complete with handle, springs, AUTOLOCK pins and sheet metal housing.

CO9955 The double AUTOLOCK lever for PREMIUM contention - **PATENTED**

13.3 kg

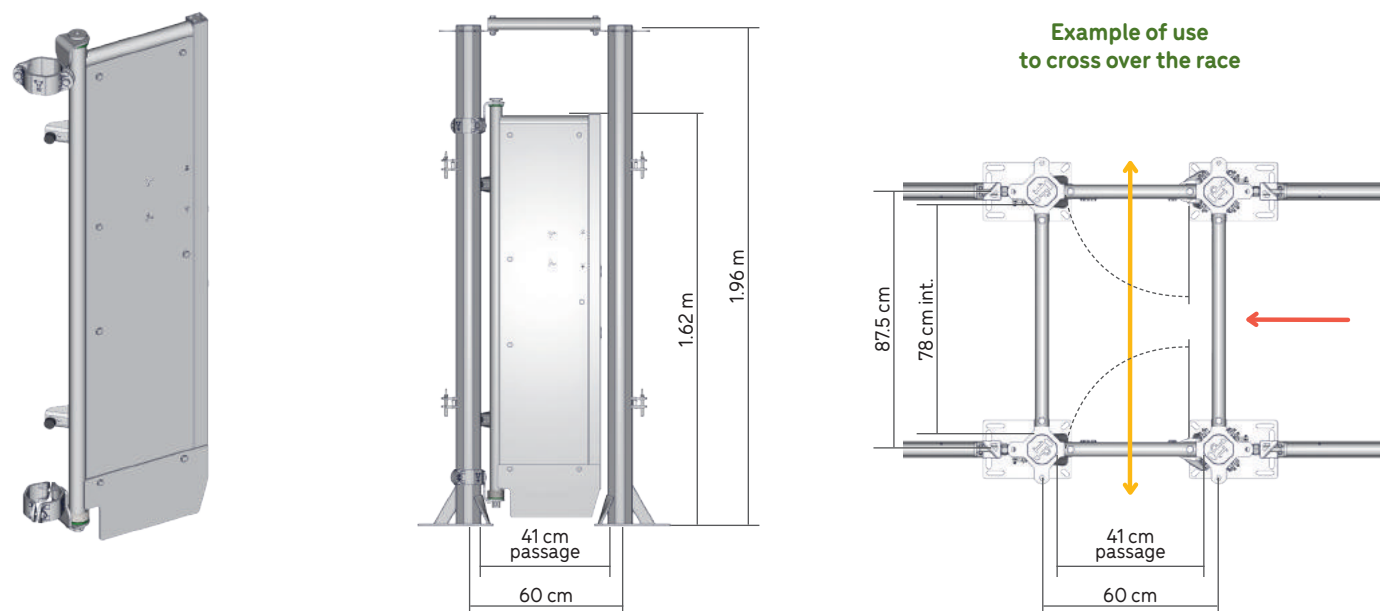

■ CONTENTION MAN PASSAGE GATE L. 60 CM

The man passage gate used in the PREMIUM contention range is fixed by bracket on the OCTAGONAL post.

It is sheeted over its entire height and is held closed by a drawback spring. It is fitted between 2 OCTAGONAL posts 60 cm apart and offers a 41 cm passage. It opens inwards to the race and has 2 rubber stops to prevent animals from coming out. It must be fitted in the flow race so that the pressure of the animals pushes the gate to the stop but does not allow it to open.

J CO3047 Contention man passage gate L. 60 cm

33.1 kg

■ POST ON CONTENTION PLATFORM

The **OCTAGONAL** posts on the contention platform are of lengths 2 m and 2.42 m.

They have a special platform 300 x 200 mm with strengthening gusset plates and can be used to provide races and holding pens as required.

CORROSION

Various solutions are on option to limit zinc loss and corrosion of steel due to prolonged contact with silage, bedding and manure, and we recommend regular maintenance.

Please see our general conditions of use on the Internet site.

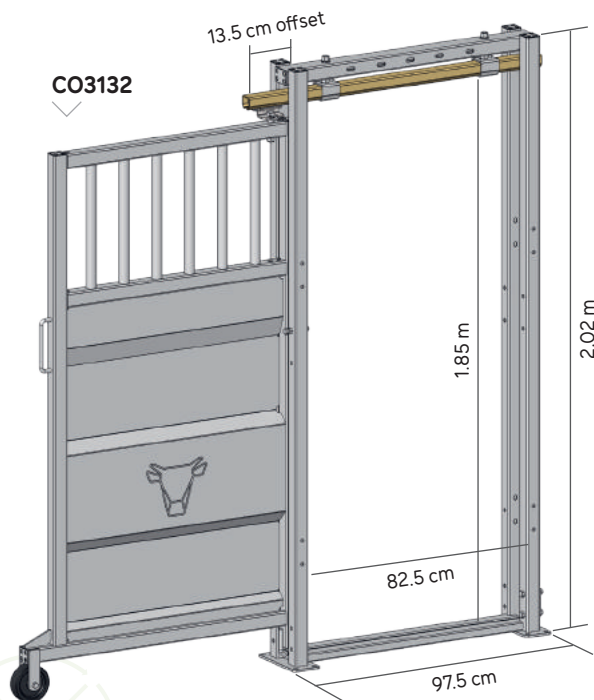

■ SLIDING SECTIONAL GATE

The sectional gate quickly stops and closes a restraint handling race particularly at a Corral exit, in the middle or at the end of a restraint handling race.

It can also be placed at certain man passages for operators to move safely.

CO3132 Sectional gate on platform

102.9 kg

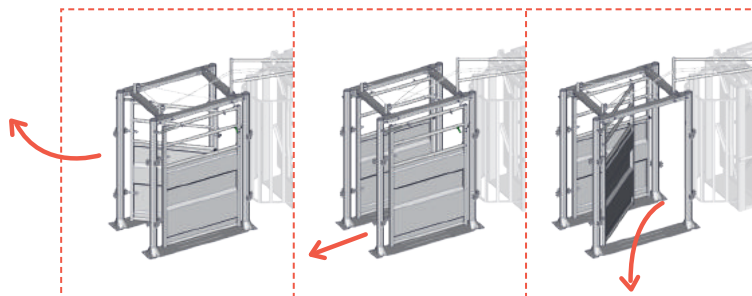

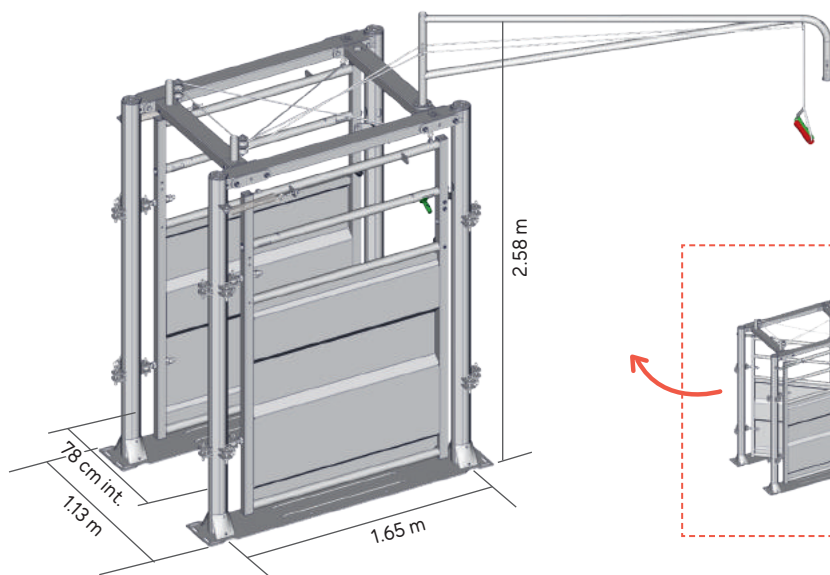

■ SORTING GATE

The sorting gate on platform has 2 fixed cord-operated sheeted gates enabling animals to be sent to the left or the right.

The barriers are returned to the closed position by drawback spring. When the barriers are closed, the animals go straight on out. The OCTAGONAL posts have welded clevises for fixing exit barriers.

JOURDAIN

N°1 MONDIAL DU TUBULAIRE BOVIN

JOURDAIN, A COMPANY WITH A WORLDWIDE REPUTATION

Our company's aim is to meet all of our clients' requirements by offering high quality products and service to our network of dealers and to livestock producers.

Innovation and the renewal of our product range are essential for JOURDAIN'S development both at national and international level.

As a company we constantly review ourselves at all levels: conception, manufacture, commercialisation, the dispatch of our products, all with the help of the 220 members of our workforce who guarantee high-quality French manufacturing.

Our growing presence on the export front confirms our worldwide reputation.

JOURDAIN is renowned for its capacity for innovation and the quality and strength of its products. It is essential that we maintain these high standards.
